HAVING PROBLEMS?

LET OUR CONSULTANTS EASE YOUR FRUSTRATION

Integra-IT offers a broad range of IT Consultancy services based around IT infrastructure that will satisfy your needs in most areas of your business. Our IT Consultants are specialists in critical areas to the business such as Data Centres, Back/Middle/Front Office infrastructure, Desktop/Voice/Server/Network infrastructure, LAN and WAN configurations, building power downs, new office fit-outs and expansion, along with structured cabling, power and cooling.

We are prepared to “roll up our sleeves” and get involved in any area of your business that you feel we are needed. We are also more than happy to get involved in due diligence exercises that will help you determine your direction for the near future and beyond. We are well versed in Strategic, Capacity and Business Continuity planning with a vision for your continued success.

If you have an IT need, our IT Consultants can satisfy that need in a highly professional, effective and efficient manner. Our IT Consultancy business is modeled around industry best practices focusing on ITIL Foundations, “Green Solutions”, Project Management Principles and many more; taking the best aspects of all of them and delivering this standard of quality to our valued customers .
