NEED TO PLAN YOUR NEXT MOVE? OUR STRATEGIES KEEP YOU IN CHECK

Companies regularly move staff around, both internally and externally, to accommodate growth. With office space in short demand, large corporations often face the challenge of either restacking their existing facilities or relocating to a new premise. Even during a downturn firms will continue to relocate staff, not only to land cheaper rents, but also to improve communication channels and relationships that drive progress and development.

Integra-IT specialises in providing professional Integrated Moves and Changes (IMAC) services to multi-national corporations based in Hong Kong. Our teams of highly skilled and knowledgeable engineers bring with them more than 20 years experience in the investment banking sector, having dealt extensively with project migrations.

Our staff go to great lengths to discover what drives your business. A capable on-site IMAC Project Manager will work closely with each of our clients to understand their needs better and make sure that every detail goes to plan.

Our goal is for your company move to be completed with zero downtime so that 'day one' at your new location will be as exciting and productive as any other.
